Thin Gossamer Nets Used for Vells-Gold and Silver Leather for Costly Evening Shoes-The Beat Way to Press a Dress.

Very thin gossamer nets, the more trans parent the better, are used for veils. many of them are black, spangled with gold. Some have a pin point spot woven in the net, and a chenille spot of larger size over it. Semetimes the spots are arranged so that they do no come over the face at all, but only at the side, and this is specially so with the tinsel spots. Many new conweb nets have been brought out, the one desideratum seeming to

In pressing any part of a dress put a bit of crinoline between the Iron and goods. This seems to be especially adapted for that purpose and the idea originated among ladies' tallors. If the iron is too hot the goods will be discolored, therefore try the iron first on a piece of the material. In any case do not press on the right side. If a hom is pressed where it is sewed on many plain fabrics it will show the line on the right side. Press evenly, slowly and heavily. Men make the ened to make the seams flatter, but when try ing any such aids always test the goods first, for if cloths have not been sponged every drop of water will spot.

Otera, the big, bold, beautiful dancer, wears gauntlet gloves, with a modiste's idea of a tailor suit; she walks with "free hip movement" and swings her arms through the full half circle, all of which affectations are closely copied by admiring girls. Her favorite ornament is a solitaire diamond, set in the middle of her forehead, pendant from an invisible wire fastened in her hair. Some idea of the majestic way she carries herself may be inferred from the fact that she can dance a night without once disturbing the flashing gem. She is also devoted to shawl drapertes and her collection from India, Persia, Chine and Japan is both valuable and choice.
